

PRODUCT REQUIREMENT DOCUMENT (PRD)

1. PRODUCT VISION (WHY THIS EXISTS)

Buy Together ek normal app nahi hai.
Ye ek Demand Aggregation Engine + Social Buying Network hai.

Problem:

- * Individual buyer = zero negotiation power
- * Vendor = high marketing cost, low conversion
- * Market fragmented hai

Solution:

- * Buyers ko group me convert karo
- * Demand ko visible aur measurable banao
- * Vendors ko ready buyers do

Result:

- * Buyers → discount
- * Vendors → bulk sale
- * Platform → control + data + revenue

2. PRODUCT GOAL (PHASE WISE)

Phase 1 (0 → 50K Users)

- * Viral growth
- * Group creation
- * Engagement

Phase 2 (50K → 2L Users)

- * Vendor onboarding
- * Deal execution

Phase 3 (2L+ Users)

- * Monetization
- * Data intelligence
- * Vendor ecosystem

3. CORE PRODUCT DNA

Ye 5 pillars kabhi break nahi hone chahiye:

- * Trust
- * Real Buyers (Fake nahi)
- * Simple UX

4. USER TYPES (DETAILED BEHAVIOR)

4.1 Buyer

Actions:

- * Browse groups
- * Join groups
- * Create groups
- * Chat
- * Participate in polls
- * Confirm deals

Behavior:

- * Curious → Join → Observe → Engage → Decide

4.2 Vendor

Actions:

- * Register
- * Create offer groups
- * Submit deals
- * Monitor demand

Behavior:

- * Lead hungry → Demand-driven selling

4.3 Admin

Actions:

- * Monitor everything
- * Control groups
- * Approve vendors
- * Track analytics

5. SYSTEM ARCHITECTURE (HIGH LEVEL)

Modules:

- * User System
- * Group Engine
- * Chat Engine
- * Vendor Engine
- * Deal Engine

6. CORE FLOW (ULTRA DETAILED)

FLOW 1: USER SIDE

- * User installs app
- * OTP login
- * Location permission
- * Home screen loads

User sees:

- * Nearby groups

- * Trending groups

- * Vendor offers

- * User clicks group

- * Group detail screen opens

- * User joins group

System:

- * Adds user to count
- * Assigns intent score

User:

- * Chat
- * Poll participate
- * Target complete
- * Group locked
- * Vendor interaction
- * Offer broadcast

User chooses:

- * Interested / Not

FLOW 2: VENDOR SIDE

- * Vendor registers
- * Profile verification

FLOW 3: ADMIN

- * Monitor groups
- * Detect fake users
- * Approve vendors
- * Track demand

7. AI + AUTOMATION SYSTEM

7.1 Auto Category Detection

User group create kare:
“iPhone 15 bulk buy”

AI:

* Detect category → Electronics
* Auto assign tag

7.2 Smart Suggestions

User search kare:

System suggest:

- * Existing groups
- * Create new group

7.3 AI Chat Summary

Group chat analyze:

Output:
“Most users want 9L under deal”

8. GROUP ENGINE (CORE TECH)

Group Attributes:

- * ID
- * Name
- * Category
- * Location
- * Target count
- * Current count
- * Status
- * Creator
- * Type (User / Vendor)

Group States:

- * Active
- * Near Completion
- * Locked
- * Deal Stage
- * Completed

9. CHAT ENGINE (ADVANCED)

Chat Types:

- * Open chat
- * Structured chat
- * Admin broadcast

Features:

- * No phone number
- * Message limit
- * Poll system
- * Thread replies
- * Topic tags

10. INTENT ENGINE

Each user ka score:

****Action Score:****

- * Join 20
- * Chat 20
- * Poll 30
- * Confirm 30
- * Vendor ko filtered data milega

11. VENDOR GROUP FEATURE (ULTRA DETAIL)

Vendor Group Creation Flow:

- * Vendor login
- * Select category

****Enter offer:****

- * Product name
- * Price
- * Target users
- * Submit group

User Experience:

- * Home → Nearby Vendor Offers
- * User joins
- * Poll participate

- * Target reached
- * Group locked
- * Vendor final deal
- * Users confirm

12. ENGAGEMENT SYSTEM

Gamification:

- * Badges
- * Leaderboard
- * Top contributors

FOMO System:

- * “5 seats left”
- * “12 joined today”

13. LOCATION SYSTEM

- * GPS-based groups
- * Radius filter
- * Area tagging

14. ANALYTICS ENGINE

Data Collected:

- * User interest
- * Category demand
- * Location demand

15. SECURITY SYSTEM

- * OTP login
- * Device tracking
- * Fake detection
- * Spam control

16. LOOPHOLES + SOLUTIONS

1. Fake users

****Solution:****

- * OTP
- * Activity tracking

2. Spam

****Solution:****

- * Message limit
- * Structured chat

3. Duplicate groups

****Solution:****

- * Merge system
- * AI suggestion

4. No trust

****Solution:****

- * Verified badge
- * Deal history

5. Vendor fraud

****Solution:****

- * Ratings
- * Admin approval

17. DEVELOPER SCOPE (DETAILED)

Backend:

- * Node / NestJS

Tech:

- * PostgreSQL
- * Redis
- * Firebase

APIs:

- * Auth APIs
- * Group APIs
- * Chat APIs
- * Vendor APIs
- * Deal APIs

Database Tables:

- * Users
- * Groups
- * Messages
- * Vendors
- * Deals
- * Analytics

18. SCREEN ARCHITECTURE (100+ SCREENS BREAKDOWN)

AUTH SCREENS

- * Splash
- * Login
- * OTP
- * Profile setup

HOME FLOW

- * Home
- * Category page
- * Nearby groups
- * Trending groups
- * Vendor offers

GROUP FLOW

- * Group detail
- * Join confirmation
- * Chat screen
- * Poll screen
- * Members list

CREATE GROUP FLOW

- * Create group
- * Category select
- * Target input
- * Location select
- * Review screen

—

VENDOR FLOW

- * Vendor login
- * Vendor dashboard
- * Create offer
- * Offer analytics

DEAL FLOW

- * Deal screen
- * Offer screen
- * Confirmation screen

PROFILE FLOW

- * Profile
- * My groups
- * My activity

19. ADMIN PANEL (MASTER CONTROL)

Must Features:

- * All groups list
- * Real-time data

ADMIN PANEL (EXTENDED)

(50+ internal screens)

- * Dashboard
- * User management
- * Group management
- * Vendor management
- * Analytics
- * Fraud detection
- * Deal tracking

Additional Tracking

- * User behavior
- * Vendor performance
- * Demand heatmap

Super Features:

- * Fake detection
- * Group merging
- * Deal monitoring
- * Revenue tracking

20. FUTURE REVENUE SYSTEM

- * Commission
- * Subscription
- * Featured groups
- * Data selling
